* Updated for Annual Report reporting year (January 1, 2021-December 31, 2021)

These numbers are collected from the current Annual Report reporting year (January 1, 2021-December 31, 2021) for each mine. Occasionally a minor revision or incidental boundary change may be approved during the year; the permitted acreages will be updated as that occurs.

All acres permitted are not scheduled for disturbance. There are various levels of disturbance, ranging from "associated" to "mine level". Associated disturbance consists of soil stockpiles, sediment ponds, other facilities, and mine level disturbance is actual coal removal area. Bonding is calculated partially on the type of disturbance an area is scheduled for. For those permitted areas not subject to any surficial disturbance, bonding is minimal.

Negative numbers are the results of corrections for errors in previous reports.

1 Permitted Acreage is the total acreage included in the surface mine permit area.

2 Includes facilities that will be in place for about one year or more, such as: roads, railroads, load out facilities, mine offices, equipment storage areas, coal storage barns, dams and impoundments, conveyor routes or other routes, powerlines, pipelines, etc.

3 Includes all surface acreage which has been disturbed by mining, soil salvage, removal of vegetation (e.g. logging, etc.) to facilitate soil salvage, facilities construction, or occupied by facilities. Disturbed acreage is equivalent to the sum of current active mining + current facilities + current complete backfilled and graded.

4 Includes facilities present at the time of reporting, such as: roads, ramps, railroads, loadout facilities, mine offices, equipment storage areas, coal storage barns, dams and impoundments, soil stockpiles, overburden stockpiles, conveyor routes, etc. Includes all surface acreage which has been disturbed by mining, soil salvage, removal of vegetation (e.g. logging, etc.) to facilitate soil salvage, facilities construction, or occupied by facilities. Disturbed acreage is equivalent to the sum of current active mining + current facilities + current complete backfilled and graded.

5 Acreage intended as final reclamation, soiled and seeded, and planted with permanent seed mixtures and seedlings (ARM 17.24.702 and 725)

6 Acres which were planted in the reporting period 10 years prior to this reporting period (ARM 17.24.725).

7 Includes all surface which has been disturbed. (Cumulative Disturbance = **Facilities + Active Mining + Complete Backfill and Grading**)

Coal Enforcement

Active Violations from July 1, 2021 through June 30, 2022

*** Phase I Bond Release Applications released prior to 1989 is equivalent to Phase I and II bond release now.*

Administrative or Lands Not Disturbed

The following releases of either lands or bond obligation occurred as a result of either taking undisturbed lands out of the permit area, recalculation of bond resulting in a significantly lower bond, or a ruling that the lands in questions were double permitted, and An Act, other than the Montana Strip and Underground Mine Reclamation Act, had primacy.

App #	Company	Site	Date Received	Date Released	Phase	Acres Released	Amount Released
